

RP single-use, frac-plug setting tools

Disposable tools eliminate wellsite redressing errors

The RP10 and RP20 single-use, disposable setting tools are adaptations of Diamondback Industries' patented SS Disposable Setting Tool.® Just remove the assembly from the shipping carton, install a plug using a Baker 10 or Baker 20 adapter kit (provided by the plug vendor), and insert a power charge.* After the tool strokes to set the plug, it automatically releases pressure before it is retrieved. At the surface, simply remove the setting tool from the running string and set it aside for recycling. No disassembly, no inspection, no redressing. The adapter kit is reused at operator's discretion.

Features and Benefits

- No wellsite redressing errors
- No pressure discharge at surface
- 6,000 lb of anti-preset protection built into the setting tool
- Two bleed ports are protected by threaded nylon screws
- The compact, lightweight tools can be handled by one person
- The short length allows additional guns for each stage

	Casing size	Maximum setting force	Outside diameter	Length	Stroke	Assembly weight	Part number
	in.	lb/ft	in.	in.	in.	lb	
RP10	4.50	30,000	2.75	26.25	6.00	25	0024851
RP20	5.50	55,000	3.81	27.38	6.13	55	0024842

* Contact Repeat Precision for power charge options.
