

PurpleSeal Express

Single-use frac-plug deployment system

Preassembled, run-ready, and disposable

The exclusive PurpleSeal Express™ system streamlines frac plug installation and eliminates wellsite redressing errors that cause costly presets and soft-sets. This system combines a PurpleSeal™ PS-C or PS-X frac plug with our exclusive patented RP Disposable Setting Tool®. The plug and setting tool are preassembled with connections thread-locked or torque-tightened to prevent back-off. Just remove the assembly from the shipping carton, insert a power charge, install a firing head/igniter, and make the assembly up to the gun string. No shear screws or set screws to install, no connections to tighten, no oil to add. After the tool strokes to set the frac plug, it automatically releases pressure before it is retrieved. At the surface, simply remove the setting tool from the gun string and set it aside for recycling. No disassembly, no inspection, no redressing.

Features and Benefits

- Preassembly at the factory eliminates wellsite redressing errors
- Anti-preset shear screws in the setting tool prevent premature plug setting
- There is no pressure discharge at surface
- The compact, lightweight assembly can be handled by one person
- The short length allows additional guns for each stage
